SEER

Comprehensive Intelligence Solutions
Law Enforcement/Public Safety User Insight

Developed in Collaboration with Law Enforcement & Higher Education

What is SEER?

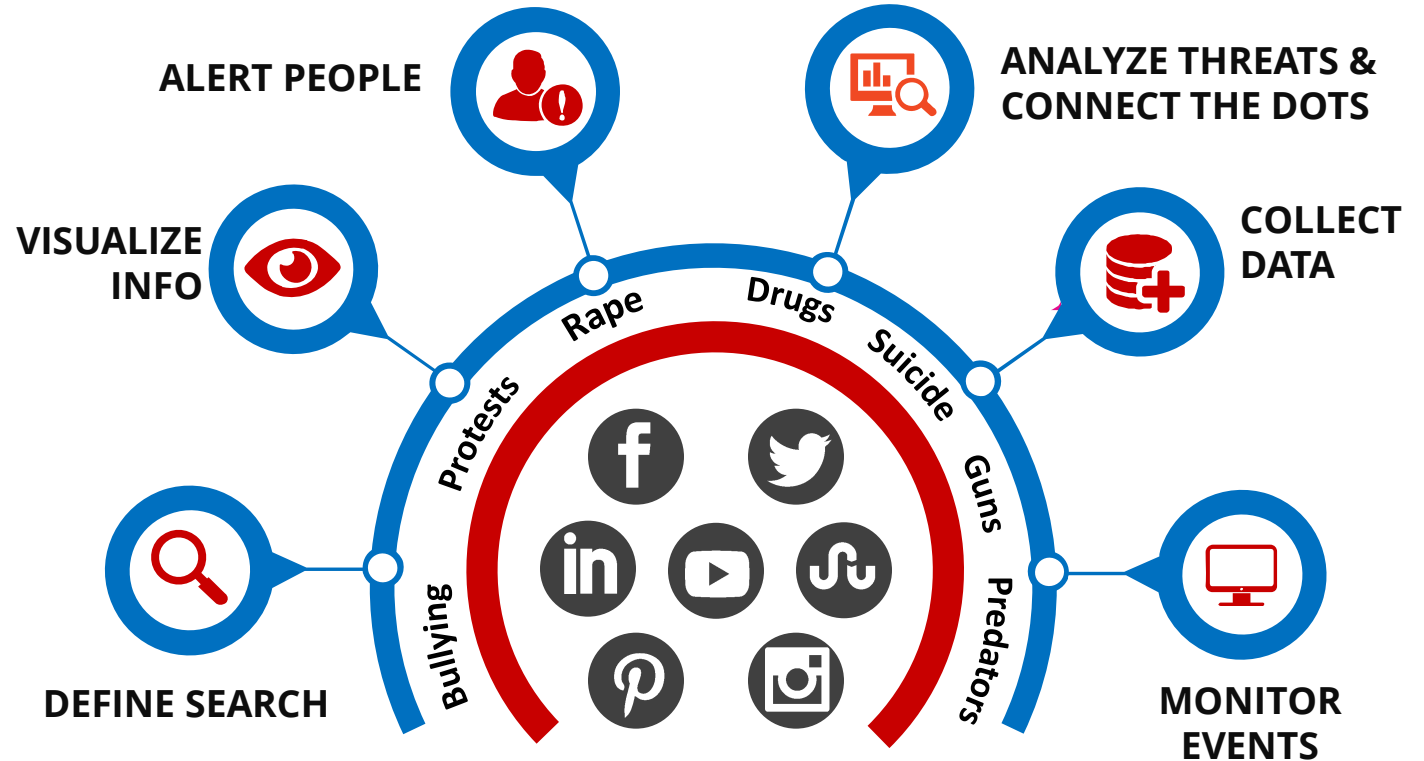

A comprehensive suite of Intelligence Tools to manage, monitor, store, and analyze any data posted on the Open Internet & Social Media .

The SEER Intel Suite will set up real-time alerts based on defined parameters: Keywords, Social Sentiment, Language Sentiment, Geolocation Tracking & Fencing, and Image-Photo Tagging/Text Recognition.

The end result provides Investigators, Analysts and Public Safety professionals with complete Social Media & Open Internet profiles on “persons-of-interest”

SEER

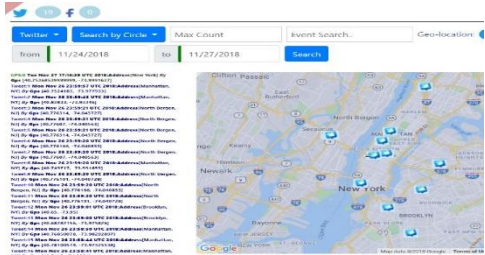

CYBER MONITORING THAT CONNECTS THE DOTS

Developed in conjunction with Law Enforcement and Higher Education.

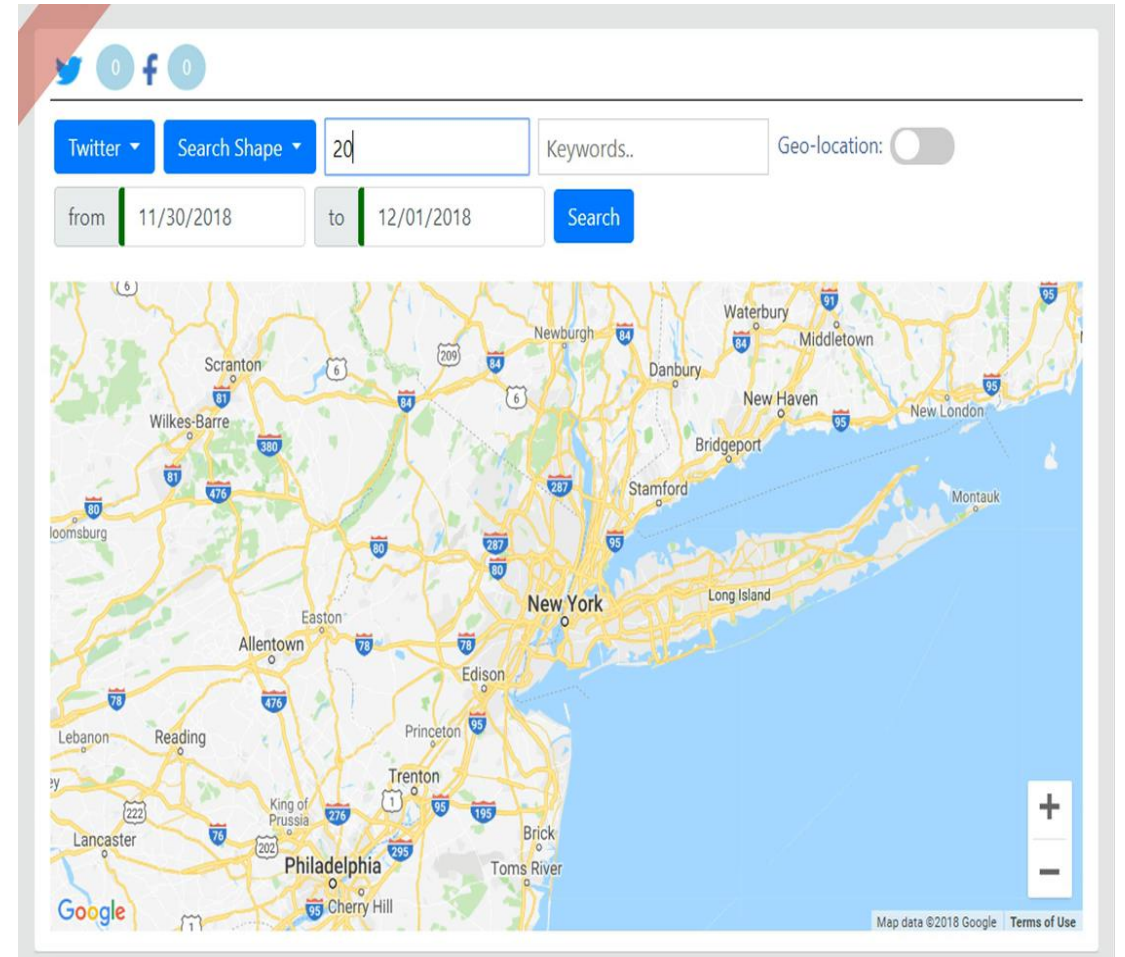

Geolocation & Mobile Tracking

SEER CYBER MONITORING THAT CONNECTS THE DOTS

Begin by importing all of your existing data & case management systems into Seer.

- Monitor usage history for any website URL that a user identifies as interesting. A user can add any URL into the system and it starts immediately storing and tracking all events on that page.
- This provides 100% coverage of the public Internet and is more powerful than just social media alone. Combined with the internal Google search can track tens of thousands of sites easily.
 1. Choose social media site
 2. Selection from
 - Circle diameter
 - Draw polygon
 - Address or location
 3. Search for keywords in tweets, posts or business name pages
 4. Enable or disable geo-location based on need
 5. Select date range for posts

Comprehensive, Robust, Simplistic Intelligence
